

Learning Hour „Social Time“

- Postings in a social media platform should not be displayed with date/time of their creation but by their age
- Implement a function which displays an age given in seconds in a reader-friendly style

Task 1: Seconds

- Display age as „## seconds“
- Periods under 10 seconds as „few seconds“

Task 2: Minutes

- Periods of a minute or more as:
„XX minute(s), YY seconds“

Task 3: Shorten Minutes

- In case of minutes with only a „few“ seconds rest, omit the seconds
- E.g. instead of „1 minute(s), 9 seconds“ just „1 minute(s)“

Task 4: Plural

- Differentiate between „minute“ and „minutes“

Task 5: Hours

- Periods of one hour or more as:
„XX hour(s), YY minute(s)“
- Plural for hours as for minutes
- Omit remaining seconds portion

Task 6: Days

- Periods of one day or more as:
„XX day(s), YY hour(s)“
- Plural for days as for hours
- Omit minutes and seconds portions
